

Bees live in communities called **hives**.

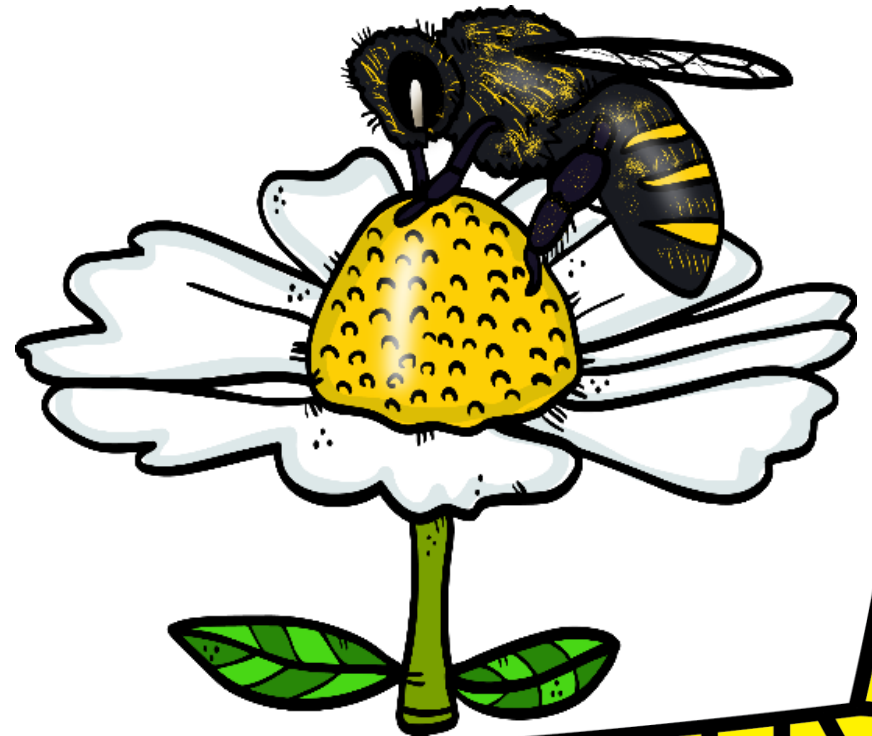

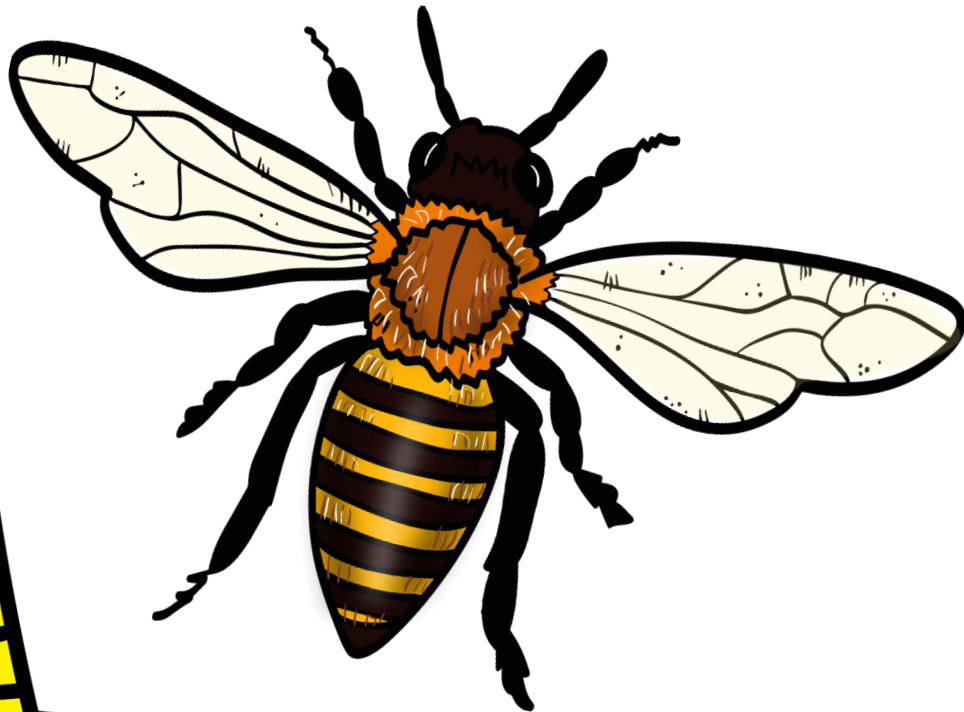

Honey and pollen are kept in a **honeycomb**. It is made of wax.

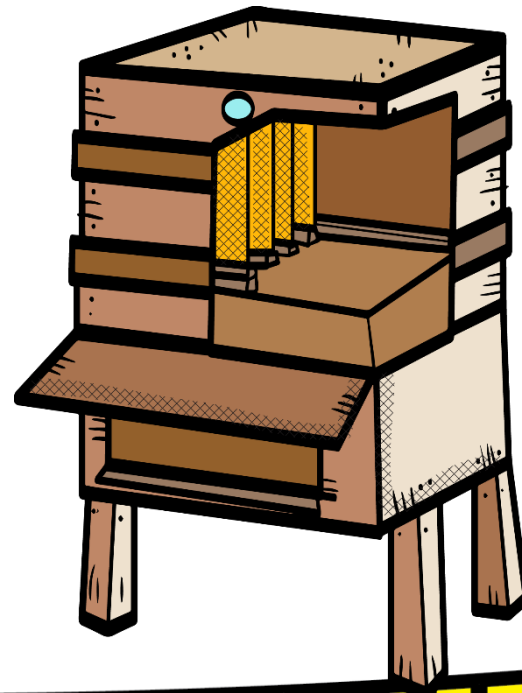

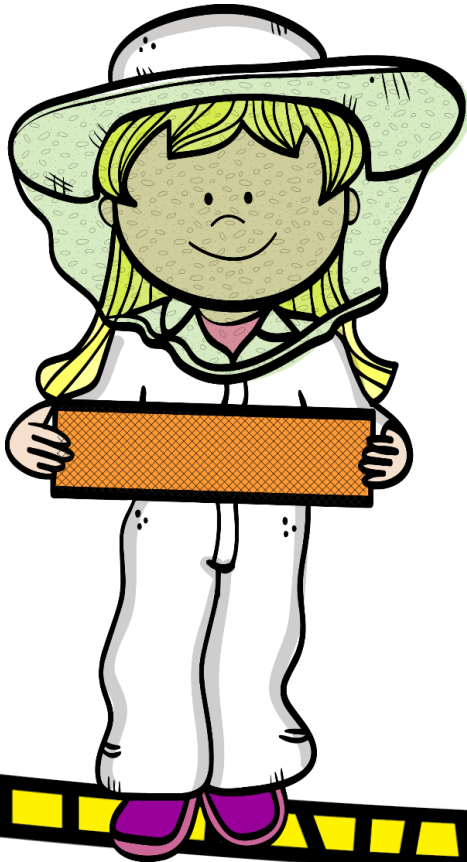

hive

Bees collect and carry pollen
and nectar from flowers
back to the hive.

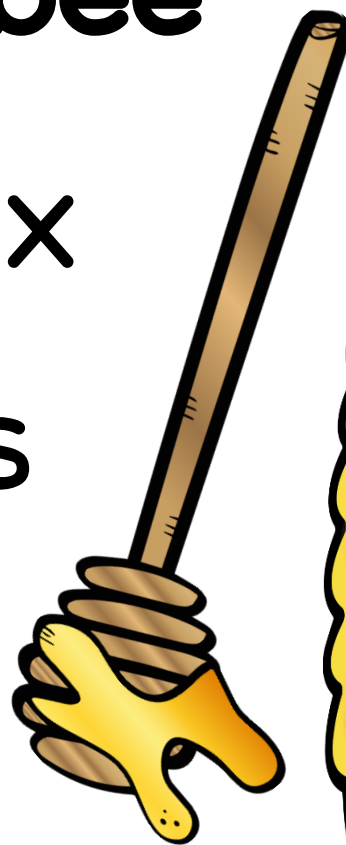

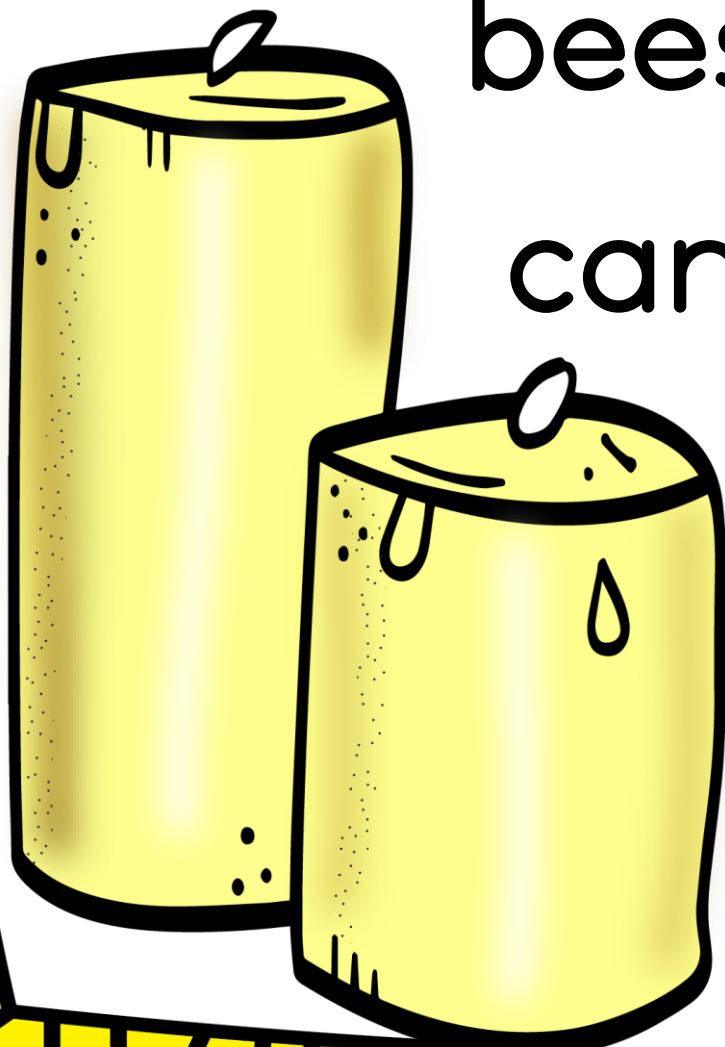

Extra honey, which bees will not use as food, is collected by bee farmers.

Products of a bee

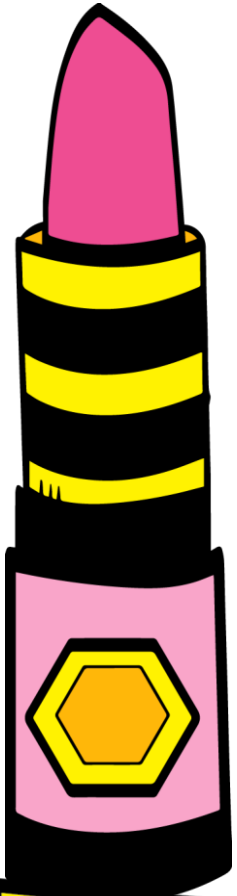

beeswax

candles

honey

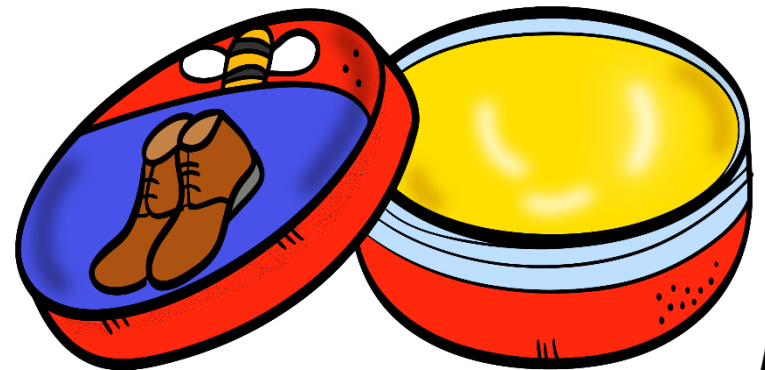

lipstick

crayons

shoe polish

Bees help farmers produce fruit.
If bees do not pollinate flowers,
we will not have fruit!
