

# Bottles & Caps

What you need:

1. Different bottles and caps

Remove all the bottle caps from the different bottles and place the caps and bottles on a tray. Present the tray to your child, your child must match the caps to the different bottles.

I have been doing this activity with my daughter since she was only 8 months old and it is still a favourite for her!

This is a fun, easy and cheap activity that promotes fine motor skills as well as hand and eye co-ordination.
