

MOLEKULE

Of 'n voorwerp sink of dryf, hang af van sy digtheid.

Alles word gemaak van molekules. Molekules is klein deeltjies wat slegs met 'n mikroskoop gesien kan word. Sommige voorwerpe het molekules wat naby aan mekaar is. Ander het molekules wat verder van mekaar af weg is. Dit is digtheid.

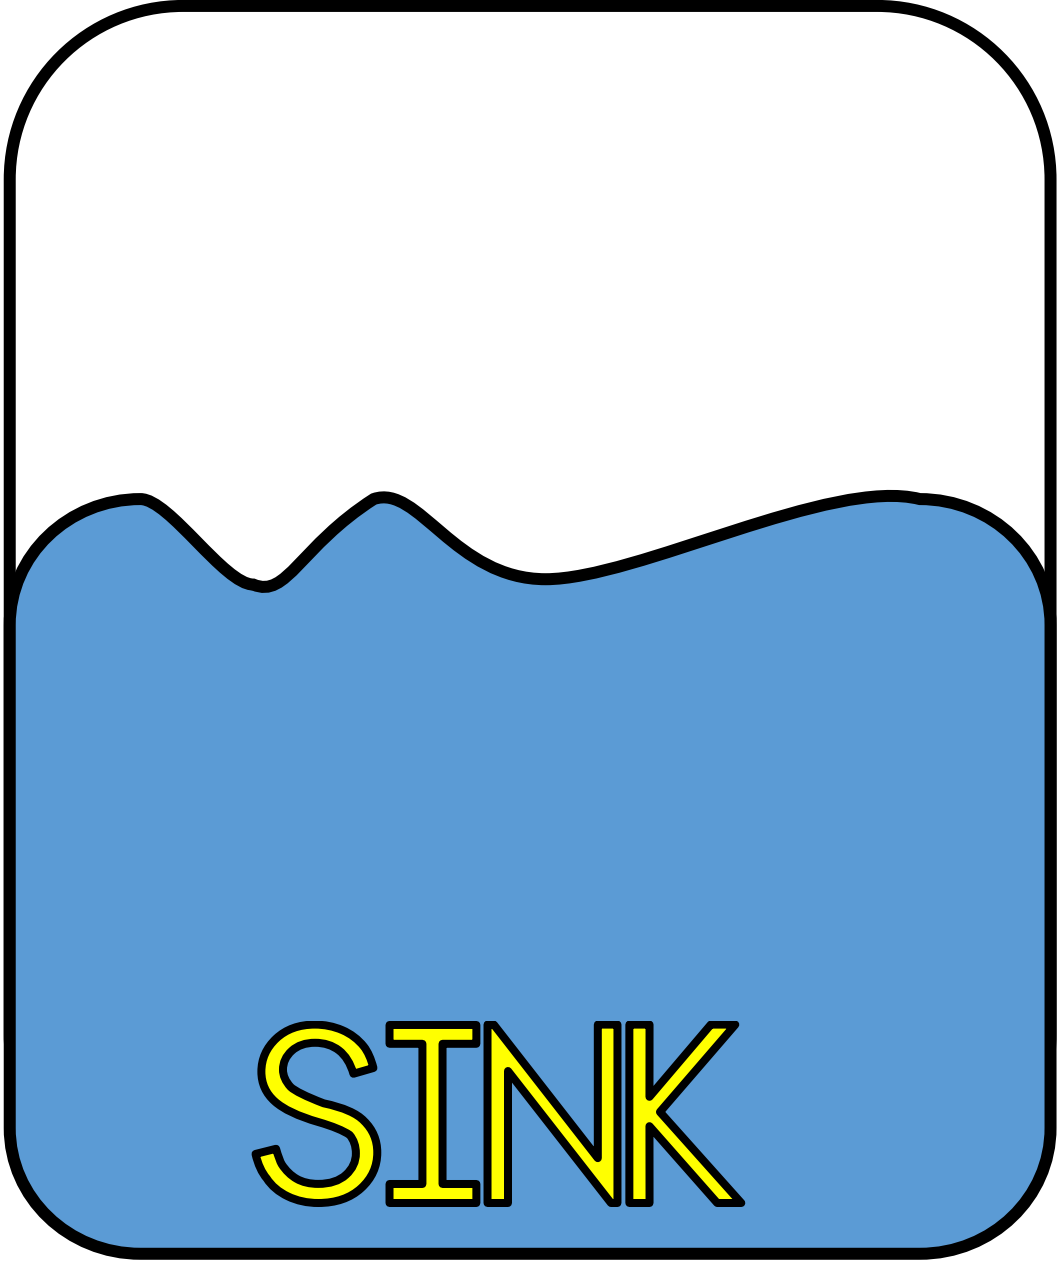

DRYF

'n Voorwerp dryf as dit bo-op die water kan bly.

Voorwerpe wat se molekules vêr van mekaar af is sal dryf.

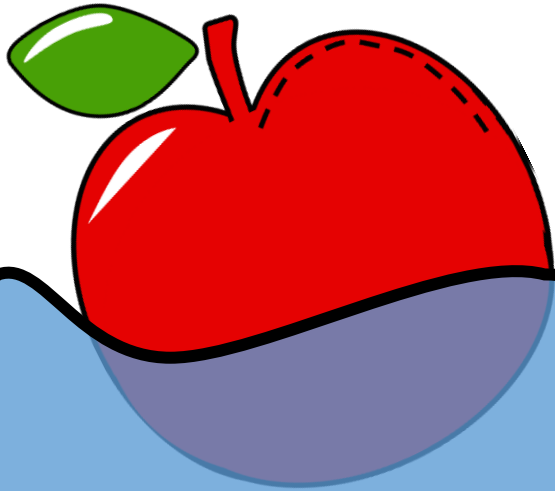

SINK

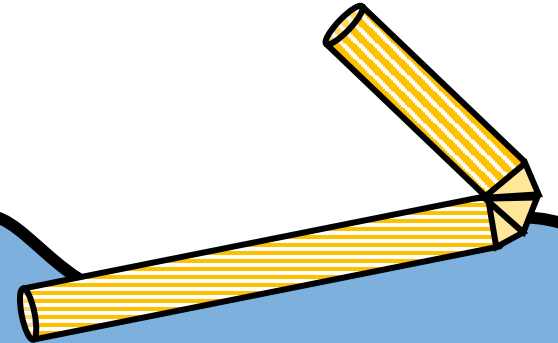

'n Voorwerp sink as dit tot op die bodem sink.

Voorwerpe wat se molekules naby aan mekaar is sal sink.
