

SYMMETRY

REMEMBER !

These shapes are symmetrical. Both sides look the same. The line is called the line of symmetry. Some shapes have more than one line of symmetry.

1. Draw the lines of symmetry for each shape and write how many lines of symmetry it has.

2. Draw the other half of the picture.

3. Draw the line of symmetry for the South African flag.

4. Decide which butterfly is symmetrical and colour it.

ANSWERS

1. Draw the lines of symmetry for each shape and write how many lines of symmetry it has.
