

Habitat

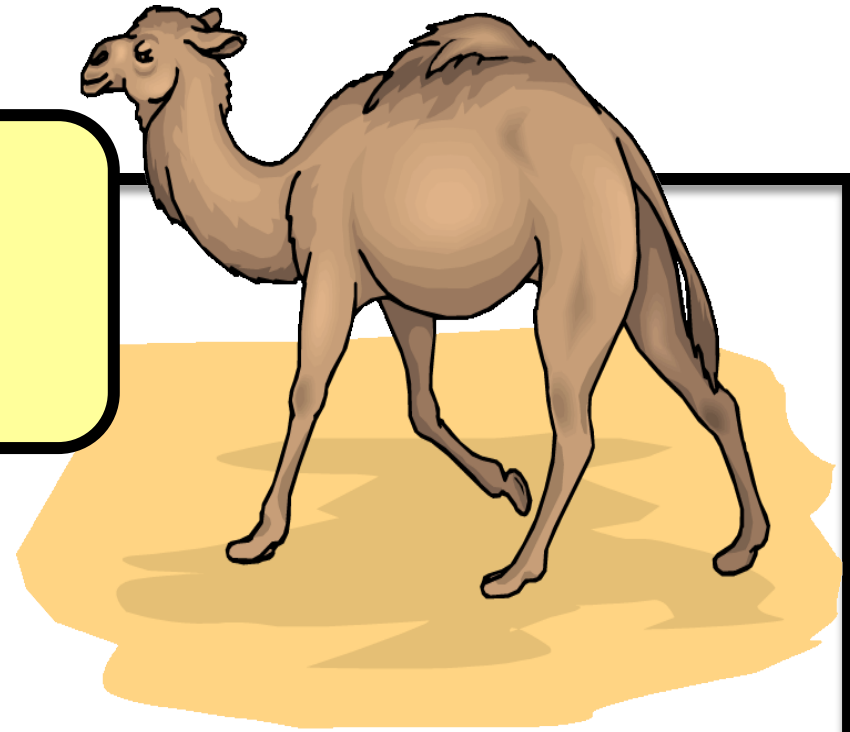

What is a habitat?

A habitat is a
place that an
animal lives.

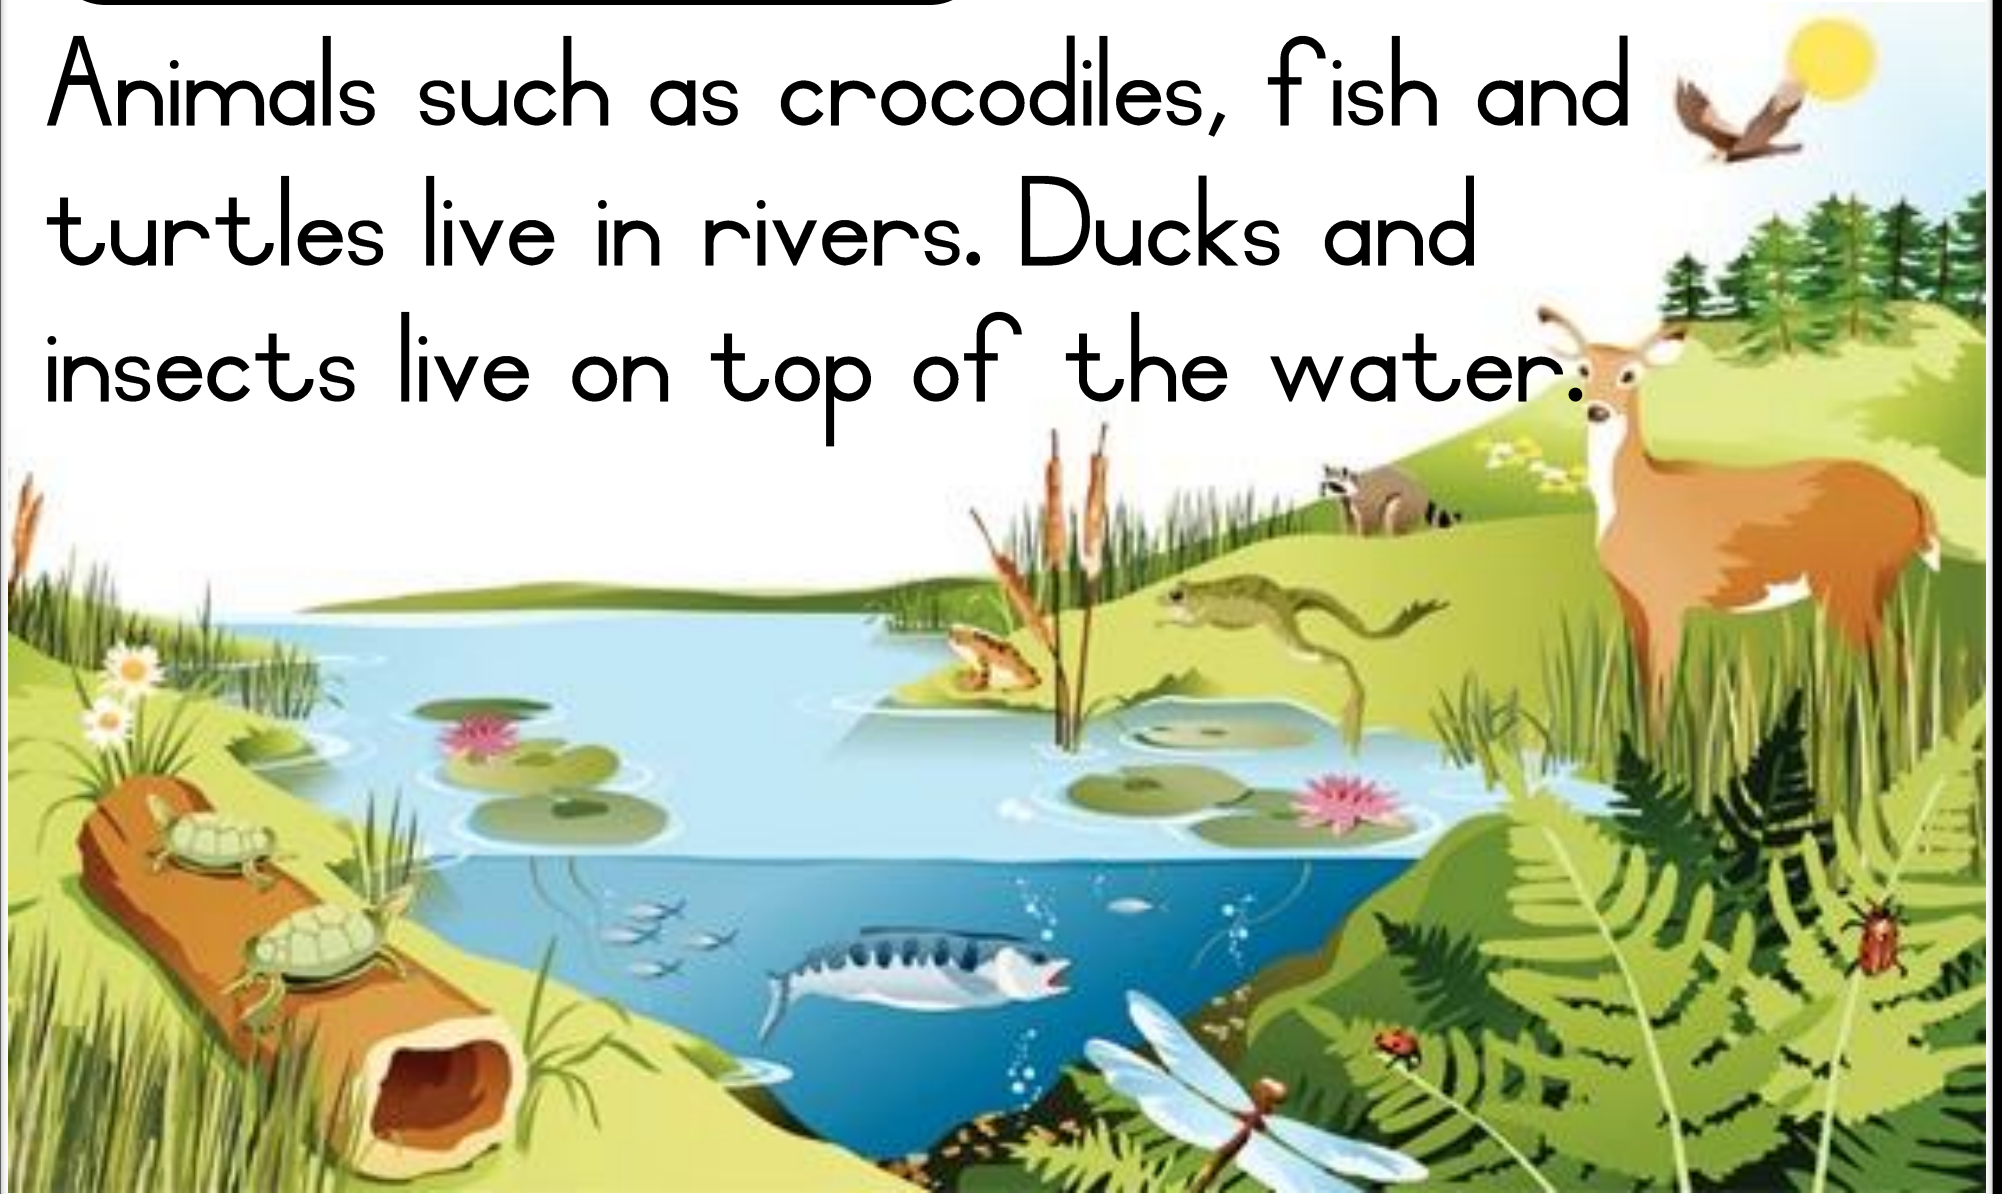

Dessert

Desserts are dry and very hot. Animals which live in a desert doesn't need so much water.

Rivers

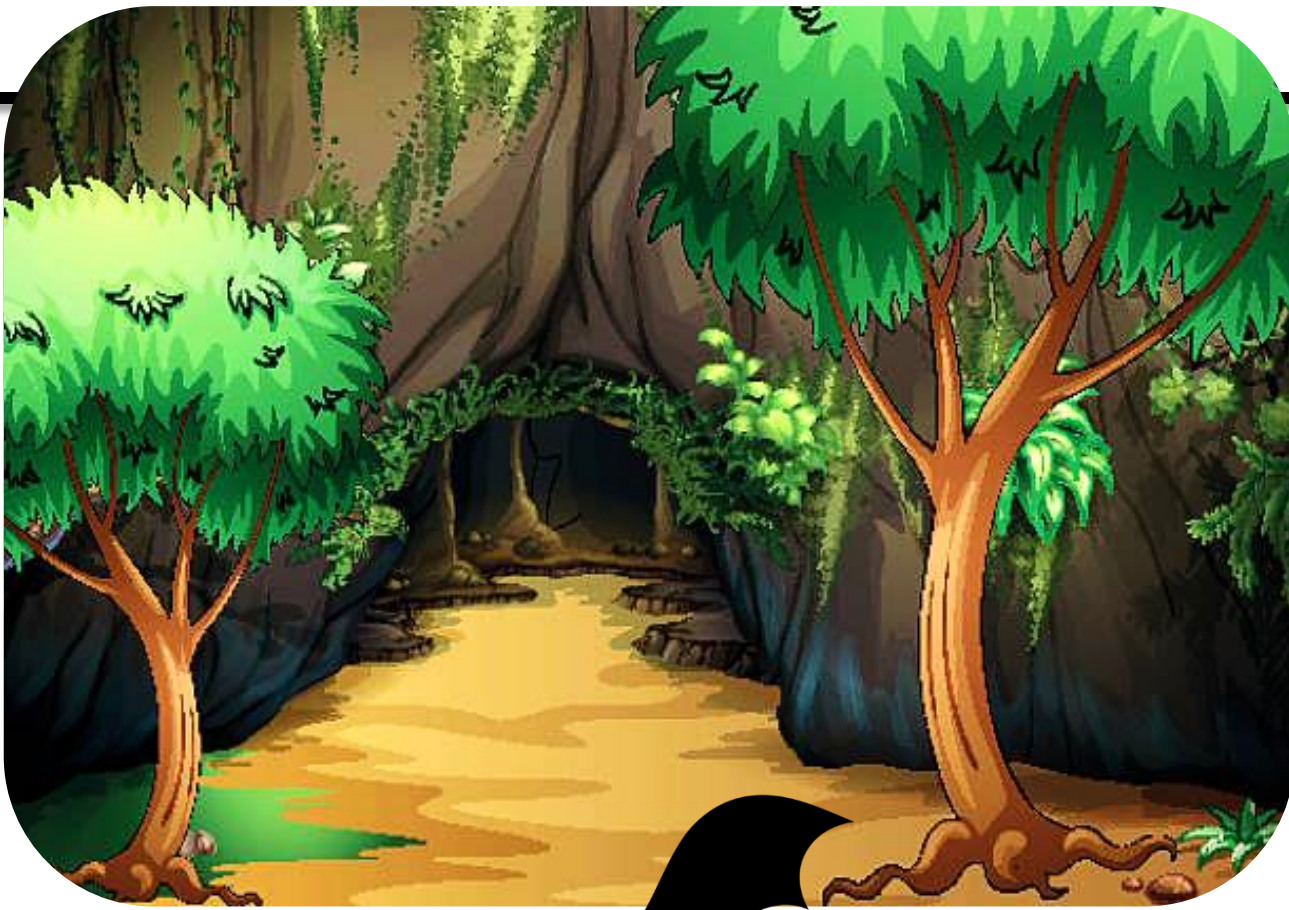

Animals such as crocodiles, fish and turtles live in rivers. Ducks and insects live on top of the water.

Forests have a lot of trees close to each other.

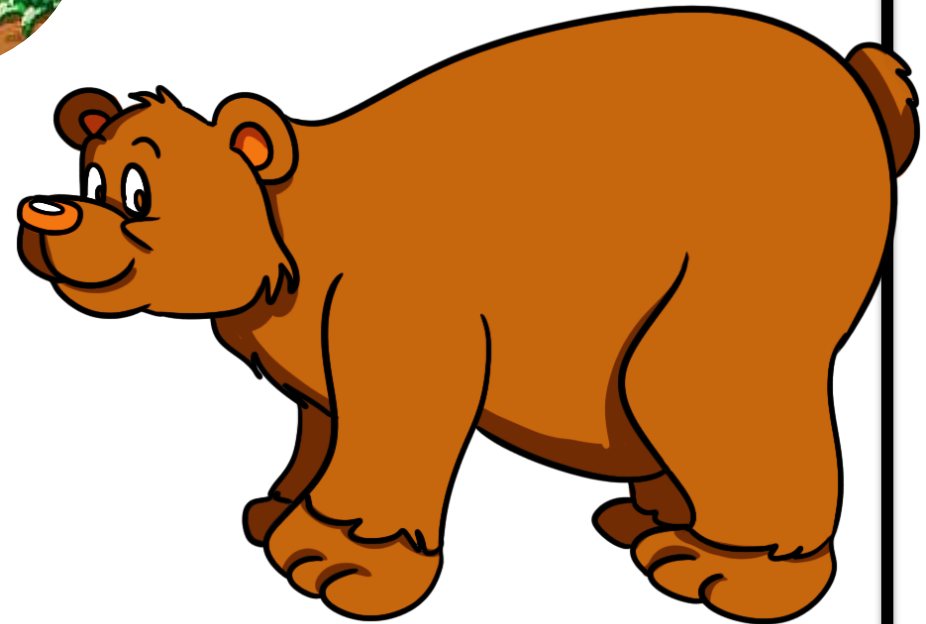

Animals such as
bats and bears
live in caves.

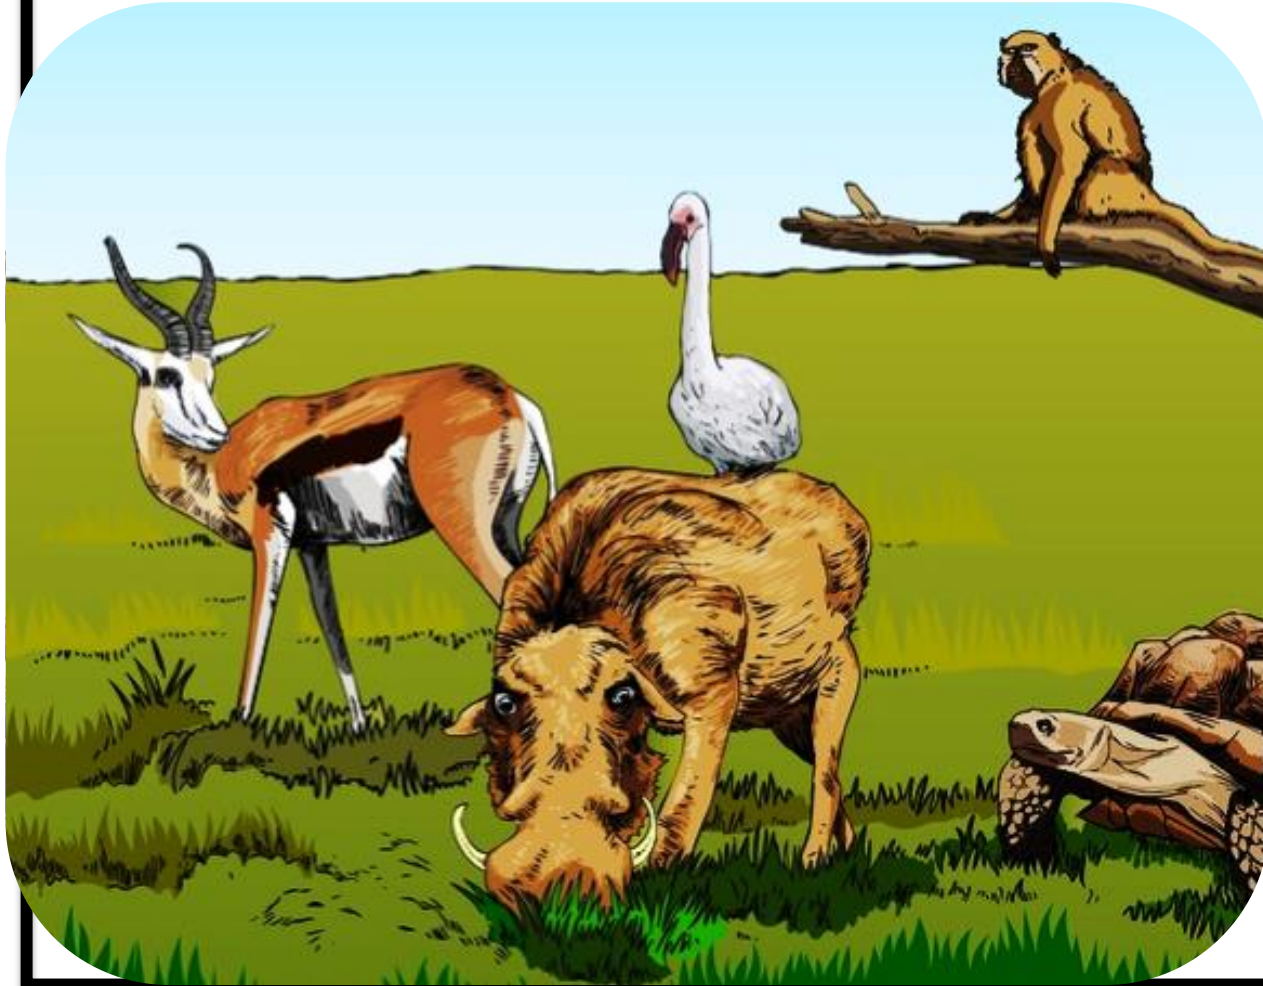

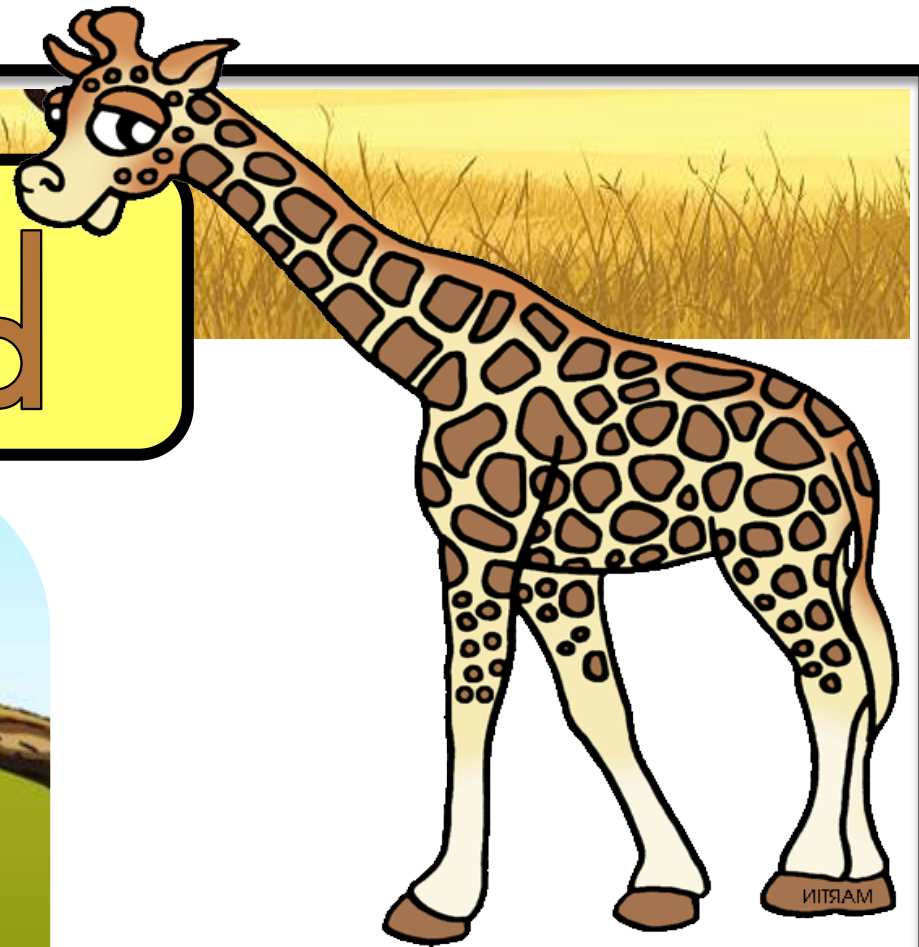

Cave

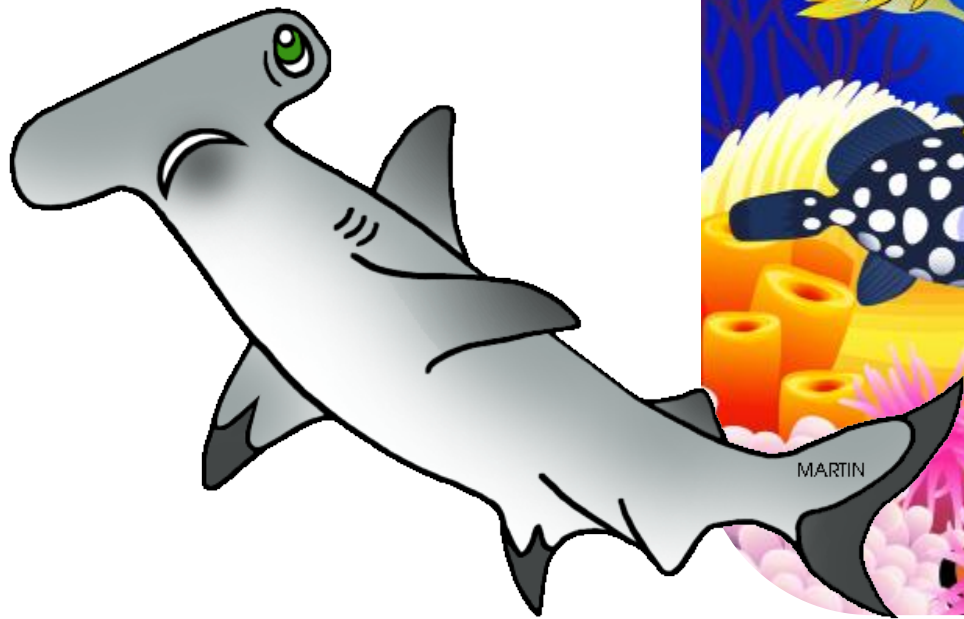

Grassland

Grasslands have mostly grass and few trees.

Ocean

The sea has salt water.

Animals such as fish, seals, sharks and so much more live in the sea.
