

The effects of the seasons

# Spring

In the  
spring  
trees  
begin to  
**bud.**

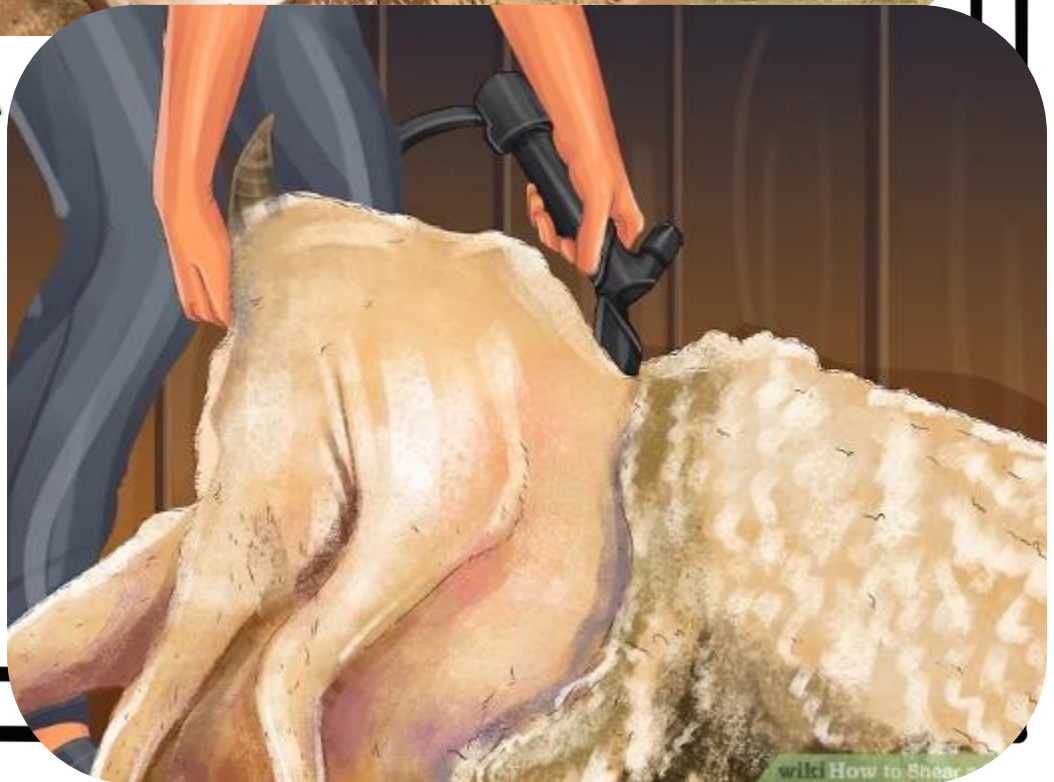

The effects of the seasons

# Spring

The  
farmer  
shear  
the  
sheep.

The effects of the seasons:

Spring

Nesting

The birds make nests and lay eggs.

The effects of the seasons:

# Summer

The  
farmers  
pick their  
fruit.

The effects of the seasons:

# Winter

Some animals sleep through the winter. We say they

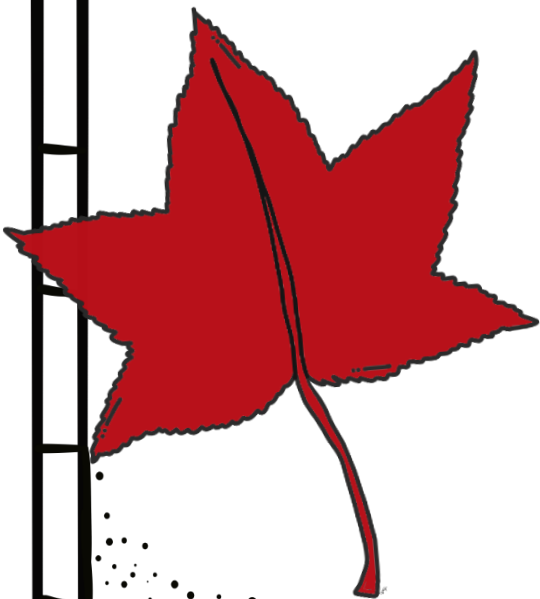

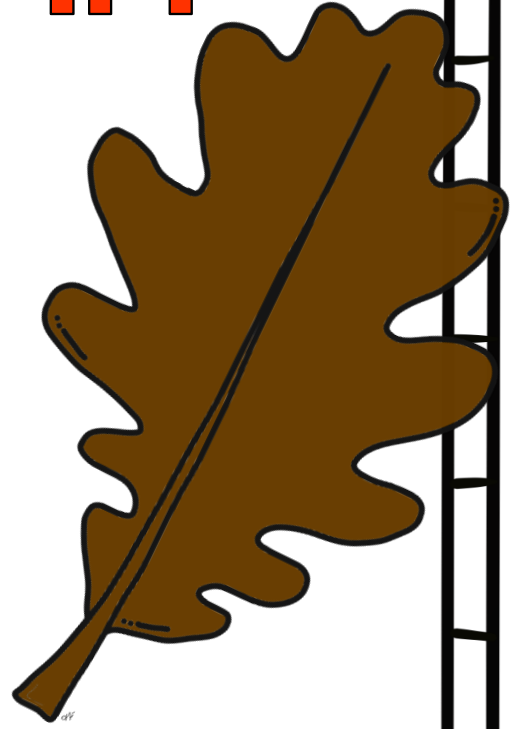

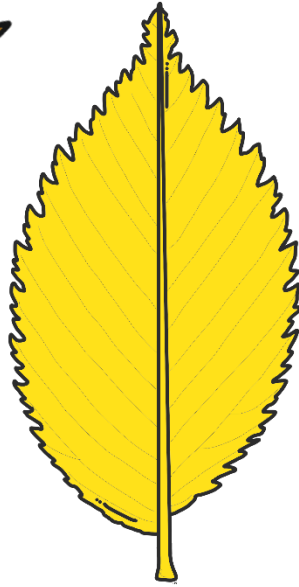

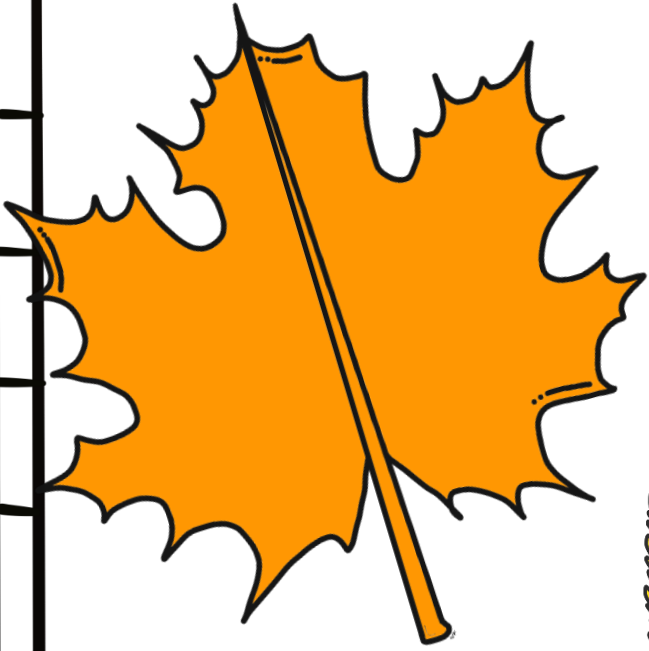

**hibernate**. They keep

warm because of their thick coat.

The effects of the seasons:

# Autumn

The leaves of the trees become

brown, yellow,

orange and red.

The effects of the seasons:

# Autumn

Some animals store their food as they prepare for the winter, for example squirrels.
