

Length

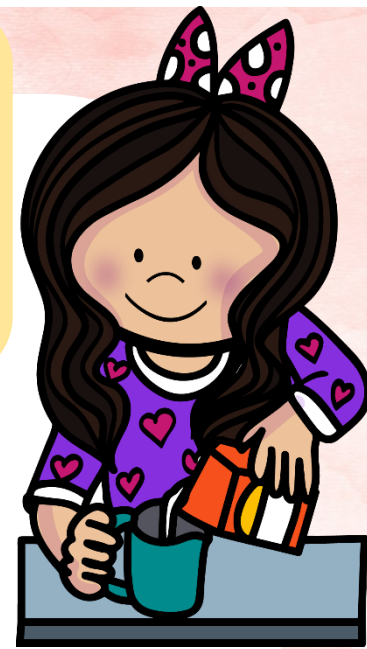

Length is how long
an object is.

←—————→
Length is measured in:
millimeter - mm
centimeter – cm
meter – m
kilometer - km

Capacity

How much a
container can hold.

Capacity is
measured in:
milliliter - ml
liter - l

1 liter = 1000 ml
1 cup = 250ml
1 teaspoon = 5ml

We measure the
capacity of a liquid
with:

measuring spoons

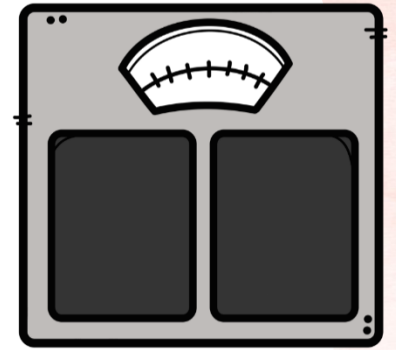

measuring cup

measuring jug

Mass

We use a scale to weigh how heavy or light we are.

Mass is measured in:

gram - g
kilogram - kg
